

## IQSweb

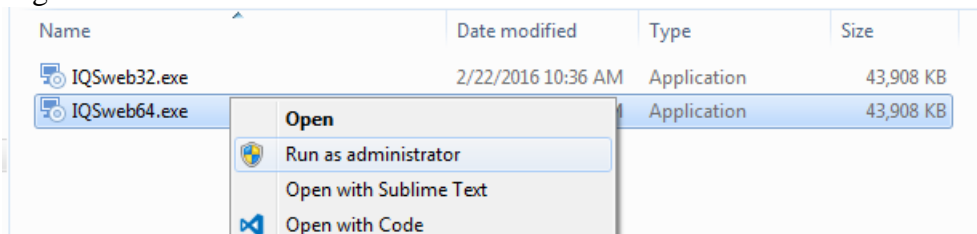

### V4.0.0 to V4.0.2 Upgrade Instructions

Please follow this document if you are upgrading your IQSweb 4.0.0 installation to V4.0.2. If you are performing a new installation of IQSweb or upgrading from V3.1.2 or earlier, please use the main installation instructions located at <http://vdatasys.com>.

**Please Note: You do not need to uninstall IQSweb V4.0.0 before proceeding with this upgrade. This installer will upgrade the existing installation.**

#### ***Upgrading IQSweb from 4.0.0 to V4.0.2***

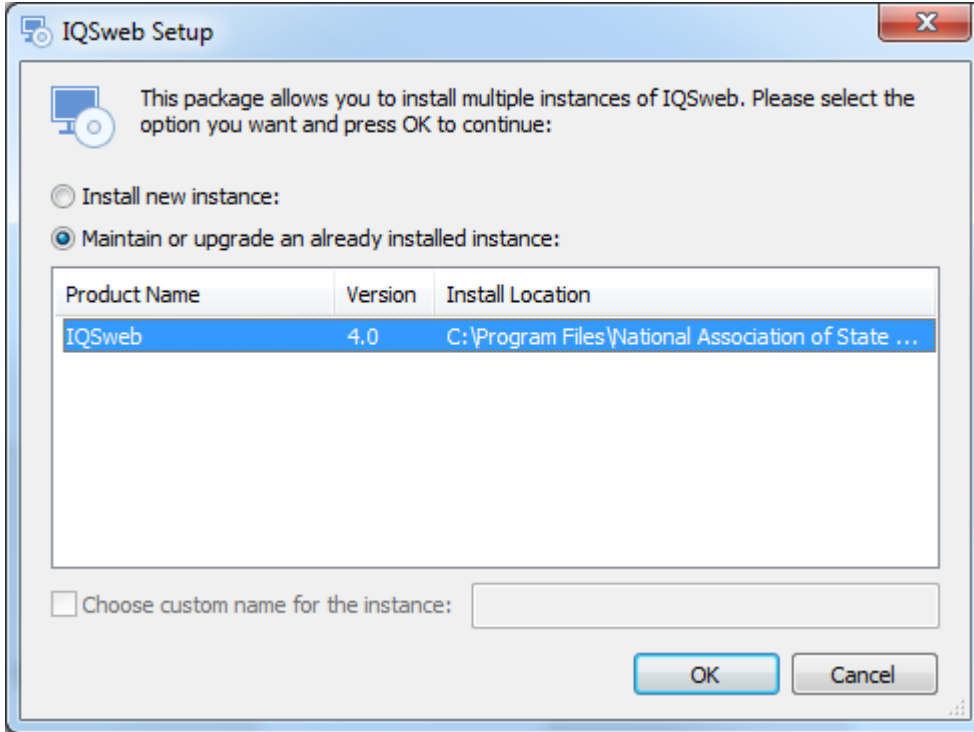

1. On the computer where IQSweb is installed, download the V4.0.2 installer. Select the 64-bit version if you previously installed the 64-bit version of IQSweb V4.0.0. Otherwise, download the 32-bit installer.
2. Right-click and run the installer as an Administrator.

9. Confirm the database connection settings. These settings will be transferred from IQSweb 4.0.0. Click **Next**.

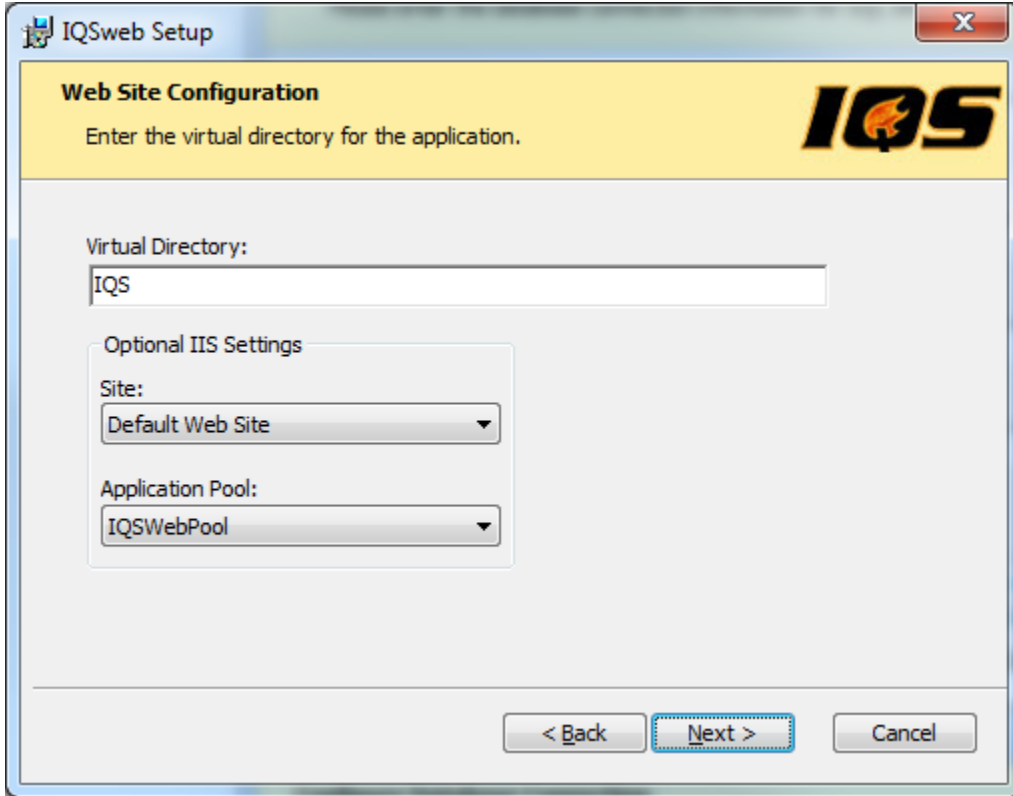

The screenshot shows a Windows-style dialog box titled "IQSweb Setup". The main heading is "Configure Database Connection" with the IQS logo to the right. Below the heading, it says "Please enter the database connection information for SQL Server." There are four input fields: "Database Server Name:" containing "2V28DZ1\SQLEXPRESS", "Database Name:" containing "IQS", "Database Server Login Name:" containing "IQSUser", and "Database Server Login Password:" which is masked with ten dots. At the bottom, there are three buttons: "< Back", "Next >" (highlighted in blue), and "Cancel".

## IQSweb V4.0.0 to V4.0.2 Upgrade Instructions

14. Go to the IQS login page and click the About link in the lower left corner. The Database Version should still be 4.0.0. The Program version should be 4.0.2.

### **About IQSweb**

**Program Version: V4.0.2**

**Database Version: V4.0.0**

You can also confirm installation by going to **Programs and Features** in the Control Panel. IQSweb should now show up as version 4.0.2.
