<b>7/3/2012</b> Security Issue Patch	V3.0.1	V3.0.1

## Issue Fixes

The following issue fixes and enhancements are included in IQSweb Version 3.0.1

### General

1. Removed Client and Server Information from **About** page for security purposes. (600)
2. Added a light yellow background to auto-complete search function on drop-downs to make them easier to read. (587)
3. Added robots.txt file to prevent web search engines from scanning IQSweb sites. (558)
4. Web Service Install file has been fixed so that the Fitness Override is defaulted to "No" for new IQSweb installations. This only affects first time installations. (474)

### Certifications/Training

1. Fixed issue where course hours were not automatically filled in on new records based on the hours in the courses reference table. (548)
2. Added hazard type to the display of course code and title to differentiate courses with the same code but different hazard type. (602)
3. Fixed issue where new courses added to the courses reference table were displaying as a blank in the course drop-down in the certifications/training tab. (603)

### Help

1. Removed the help link on the login page for security purposes. (560)

07/03/2012

IQSweb Version 3.0.1 Release Notes

2. Upgraded to Adobe RoboHelp v9.0.1.262 and re-generated IQSweb help. This upgrade addresses a cross-site scripting security issue present in previous versions of RoboHelp. (560)
3. Updated help pages to reflect other changes made in this release.

### ***Post Fitness***

1. Added a warning if the user attempts to use the paging to go to another page of persons before saving changes to the current page. (511)

### ***Reference Data/Jobs and Courses***

1. Fixed issue where a new job or course could not be entered if the job or course code already existed but had a different hazard type. (557)

### ***ROSS Admin***

1. Fixed 2 issues on the ROSS Admin screen which is used only by the IQS Support team for trouble-shooting ROSS/IQS synchronization issues. (605)

### ***ROSS/Import Experience***

1. Changed functionality so that the import experience does not open in a new window. (580)

### ***Training/Student Selections***

1. Added a warning if the user attempts to use the paging to go to another page of persons before saving changes to the current page. (567)
