Bug Fixes and Enhancements

The following bug fixes and enhancements are included in IQSweb Version 3.1.2.

General

1. Configuration changes to address Internet Explorer 11 browser compatibility issues (746) and Google Chrome and Safari time-out errors (714)

Help

1.

Reference Data

1. Fixed issue where jobs without a fitness level did not appear in the Reference Data/Jobs screen (743)

Reports

1. Fixed problem with Master Record report where equivalent courses were being repeated if more than one person was selected for the report (758)

ROSS Management

1. Fixed issue where "Resolve" button on Unresolved Results tab was not functioning (767)

2. Fixed issue where IQS was not correctly trapping for invalid ROSS username or password resulting in user's easily making 3 incorrect tries and locking their account 781)

Training Course Schedule

1. Fixed issue where if the user entered a new scheduled course with the same course, location, start date and end dates as a previously entered course an exception error was generated. Now the user gets a pop-up message stating the course already exists.

Transfer In/Out

1. When transferring files in from either IQS or IQCS, a message was added that if the file cannot be read by IQS the user needs to contact the agency who created the file to have them provide a file in the correct format.
