<b>2/5/2018</b> V5 Major Release	V5.0.0	V5.0.0

## Bug Fixes and Enhancements

The following bug fixes and enhancements are included in IQSweb Version 5.0.0.

### *Installer Changes*

No changes

### *General*

<b>Bug Id</b>	<b>Description of Change</b>
3055	Updated GRIDS adding control so users can select the number of records to display.
3038	Replaced alert/confirmation windows with html dialogs. In Google Chrome, after an alert has appeared (such as on the Post Experience page) multiple times on a page, Chrome will ask the user if they want to prevent the page from displaying more alerts. If the user selects the checkbox, no more alerts will be visible. This fix replaces the browser alerts and confirms and uses a modal popup.
2936	To address security concerns, removed the reference to log files in all error messages. Location of log file is described in the IQS Help.

### *IQS Catalog Administration and Applying Updates*

<b>Bug Id</b>	<b>Description of Change</b>
2942	Added error message if IQS cannot download the National Catalog file and a different error message if it can download the file but has problems trying to read it.

### *Attachments*

<b>Bug Id</b>	<b>Description of Change</b>
3050	In the Tools > Cleanup > View Dependencies module added Attachment Files as a Category allowing the user to select a specific attachment folder and shift files from one folder to another.
2980	Added the ability to preview image and PDF files in Person/Org Attachments.

## Certifications

Bug Id	Description of Change
3051	Experience – The incident performance evaluations are now ignored in experience records when extending the currency (qualification expiration date).
3034	Experience – To comply with current direction in the PMS 310-1, modified IQS to allow successful trainee assignments to keep qualified positions current.

## Tools/Cleanup

Bug Id	Description of Change
3042	Cleanup - Replaced the current list with a scrolling list that allows up to 500 names per page. Added Select All and Clear All buttons. That allows the user to apply the operation to a much larger group of people at once, while making it easy to review all of the names on the list and still add or remove individual people to/from the operation.

## Emails

Bug Id	Description of Change
2996	"Email" menu option now available to additional roles of Data Entry Support and Training.

## Incident Qualification Card

Bug Id	Description of Change
2969	Fixed the incident Qualification Card so that the Certifying Official block lists the fields in order of Name Title Date rather than Name Date Title.

## Maintain Users

Bug Id	Description of Change
3040	Fixed the edit Username on Maintain Users page to enforce 20 character max length.
3026	Added the ability to search for a specific "username" in Maintain users.

### Person/Org

Bug Id	Description of Change
3063	Fixed issue where Station address was not immediately synchronizing with a station name change
3054	Employment Status – on drop-down list and in reference table – valid ROSS values are shown in BOLD font.
3025	Addressed issue where Persons dropdown does not properly update.
2986	Fixed issue where using drop down box in Person/Org screen, if select a different name, the name changes but info remains for previous person. Issue was caused by special symbols in the data. Code was fixed so that special symbols no longer present a problem in the data.

### Post Certifications

Bug Id	Description of Change
3049	All jobs are now available to be applied using the Post-certifications screen.

### Post Refresher Training

Bug Id	Description of Change
3057	Added ability to Post multiple refresher trainings for one day RT courses

### Reference Data

Bug Id	Description of Change
3054	Employment Status – on drop-down list and in reference table – valid ROSS values are shown in BOLD font.

### Reports

Bug Id	Description of Change
3073	Incident Qualification Card – Made the following changes: <ul style="list-style-type: none"> <li>Orders selected persons alphabetically.</li> </ul>

	<ul style="list-style-type: none"> <li>• For Qualification Level dropdown updated text: "All", "National Only", "State Only", .etc.</li> <li>• Includes counter of how many people selected.</li> <li>• Search box is now same width as available persons.</li> </ul>
3068	Added totals section to Qualifications to Expire By and Task Books to Expire By
3065	Training Courses needed by position – added position priority column.
3064	Training Missing Report: Sorted by required training
3053	ROSS History - added the org path on the ROSS History tab and on the CSV download.
3043	Training Missing Report - ensure that equivalencies are used to calculate if a course is missing
3041	Displaying deleted users on User Org Level Access report and Email Users page
3032	Fixed Printing error on Quals to Expire report
3028	Nomination Report update
3012	Reports - # Open Taskbooks
3007	Equivalent Courses not being considered when on reports
3005	Red Card - space for signature
2984	Personnel List Report – Fixed report issue where only users with an email address in their record appear on this report. Everyone shows up on the report whether they have an email address entered or it is blank.
2957	Course Roster History - total student count is not at the end of the report. Totals have been added. Has total been added?
2955	Task Books to Expire - change report to look the same as Quals to Expire
2954	Qualifications to Expire - "Job" does not stay with the person's names
2953	Master Record - email address prints
831	Student Selections: Outside Students - Organization use agency list for selection

### **ROSS Administration**

<b>Bug Id</b>	<b>Description of Change</b>
---------------	------------------------------

3045	For security, created new ROSS Admin Utility Password
------	---

### *ROSS Management*

Bug Id	Description of Change
1906	Fixed issues when ROSS person is archived, they were not being removed from ROSS.

### *ROSS Import Experience*

Bug Id	Description of Change
3080	<p>Improved the ability to view/retrieve the log file creating when importing experience. The following changes were made:</p> <ol style="list-style-type: none"> <li>1. Now the count for records imported and not imported are displayed after the import is done.</li> <li>2. There is a button to download the report immediately after the import is done.</li> <li>3. There is a section at the bottom of the Import Experience page to view the import logs for a date range. From the table, you can see who imported the file, the import date, and a link to view the report.</li> </ol>

### *Security*

Bug Id	Description of Change
2931	Fixed password generator so that is always generates a password that meets the specifications for a valid password in IQS.

### *Tools/Export Persons*

Bug Id	Description of Change
2995	Added the ability to export data for one person

### ***Training Course Schedule***

<b>Bug Id</b>	<b>Description of Change</b>
3062	Added Team and/or Crew selector to Training Course Schedule
2968	Fixed issue when tabbing through dates – now shows an error due to invalid dates

### ***Training Instructor History***

<b>Bug Id</b>	<b>Description of Change</b>
3076	Fixed tabbing sequence on Add Instructor input form

### ***Training Needs***

<b>Bug Id</b>	<b>Description of Change</b>
3059	Needs Analysis hyperlink – added Hyperlink from lists (Qualified, Trainees, Target) that links person's name directly to their Qualifications, Task books or target positions.

### ***Training Post Course Results***

<b>Bug Id</b>	<b>Description of Change</b>
2972	Added Completed Students errors on Post Course Results
3074	Training/Student Selections - corrected link so that the course selected is displayed.

### ***Training Student Selections***

<b>Bug Id</b>	<b>Description of Change</b>
2959	Add a "select all" option to copy another roster

### ***Transfer In Persons***

<b>Bug Id</b>	<b>Description of Change</b>
---------------	------------------------------

02/05/2018

IQSweb Version 5.0.0 Release Notes

3072	Transfer In - made the required fields and warning messages more apparent to the user.
------	--

### *User Roles*

<b>Bug Id</b>	<b>Description of Change</b>
3056	Removed View only on Instructors for Data Entry Support and allow people with that role to update instructors.
