| <b>8/6/2020</b><br>V6 Patch addressed IRWIN integration issues plus several bugs found in V6. | V6.1.0                  | V6.1.0                 |

*Bug Fixes and Enhancements*

The list below represents a summary of items addressed in IQS V6.1.0

| Ticket ID | Bug Fixes/Enhancement Description  | IQS Module               |
|-----------|--|--------------------------|
| 9184      | Fixed issue where adding/editing a task book was not properly updating qualifications and target position.   | Certifications/Task Book |
| 10183     | Fixed error that occurred with sending emails from within IQS.   | General                  |
| 10188     | Fixed error where 310-1 catalog update would not load.   | 310-1 Update             |
| 10195     | Fixed error where IQS could not add a qualification to IRWIN if it previously existed, but IQS is unaware of the IRWINCID  | IRWIN Integration        |
| 10196     | Fixed error where Operational Period was calculated backwards causing negative value when importing experience from IRWIN  | IRWIN Integration        |
| 10197     | Fixed error where IQS was not removing qualifications from IRWIN if the person's fitness expired   | IRWIN Integration        |
| 10198     | Fixed error where a "suggested" course for a position was flagging the refresher training as not current.  | Courses                  |
| 10207     | Made changes to overnight batch processing jobs to address IRWIN performance concerns. Randomized start times of jobs within a 1 hour period. Adjusted the behavior on Person/Org page so that changes to this page only triggers necessary changes to be included in batch job. | IRWIN Integration        |
